

## Public and Judicial Notice - Number 1

All birth certificates issued to Americans between the years 1837 to date are suspect and may be fraudulent documents representing false and undisclosed claims of settlement entered into the public record.

Absent proof of actual and factual federal municipal or territorial employment or actual federal dependency, no presumption against the standing or identity of any American born within the borders of one of the organic states can be made on the basis of having a Birth Certificate, licenses, participation in the Social Security System or any similar documentation.

In the majority of cases, all such documentation is null and void for fraud.

All such non-federal, non-resident Americans are to be presumed free men and landlords on the land and as peaceful American vessels engaged in international trade on the sea; their names and other assets must be removed from all federal bankruptcies and held harmless by all federal bankruptcy trustees. Their copyrights, trademarks, patents, titles and deeds must be promptly returned and all presumptions against them must be dropped.

All claims of federal personhood are open to rebuttal and full notice and disclosure must be given to those affected. All promises of Equal Civil Rights are extended and remain in effect. All federal employees who do their jobs in good faith are held harmless and provided full amnesty pending debt forgiveness.

All members of the American Bar Association must file their Foreign Agent Registrations no later than September 1, 2017.

--- James Clinton Belcher, Head of State
